WWW.RICCELLIENTERPRISES.COM

TRUCKING AT ITS BEST!

THE EQUIPMENT, THE MANPOWER, THE EXPERTISE TO TRANSPORT ANYTHING.™

You see them on the highways every day. Wherever you travel — throughout the Northeast and far beyond — the trucks of Riccelli Enterprises are there. We're hauling crushed stone, wood chips and other bulk commodities. We're transporting scrap metal and construction debris. We're delivering steel beams and taking away recyclables. Whatever needs to be moved from Point A to Point B, Riccelli Enterprises gets the job done right.

It's not surprising that you see Riccelli trucks everywhere. After all, we have more than 400 of them. But we're much more than just a huge fleet of trucks. Our family-owned business has earned a leading reputation thanks to decades of reliable service, safety, competitive rates and environmental friendliness. Since our very first truck hit the road in 1971, Riccelli has focused on the customer first. Instead of just thinking about today's job, we do everything we can to become an invaluable resource. When it comes to customer relationships, you might say we're "in it for the long haul."

Trucking is just a part of the big picture at Riccelli Enterprises. In addition to being the Northeast's largest hauler of bulk commodities and waste transfer, we're also one of Upstate

New York's top suppliers of stone and gravel. Plus, we offer crushing and material handling services, operate more than a dozen sand and gravel mines, manage bulk salt storage stockpiles, provide grain storage and drying services and manage a rail offloading operation.

As large as we've become, everyone at Riccelli Enterprises recognizes that quality customer service is the most important part of every day. That goes for the father-and-son team of Joseph and Richard Riccelli, as well as every employee.

Average experience among our managers is over 25 years each, and all drivers are carefully selected. When you do business with Riccelli Enterprises, you'll experience trucking at its best!

500 EMPLOYEES • 400 TRUCKS • 8 LOCATIONS

DUMP TRUCKS

Our fleet includes more than 100 well-maintained, late-model dump trucks. Without these quality vehicles, we never would have become one of the top suppliers of stone and gravel in Upstate New York.

LIVE-BOTTOM TRAILER

For hauling asphalt, stone or gravel, there's no better option than a Riccelli Live-Bottom Trailer. These trailers can legally haul up to 34 tons and are ideal for low-clearance overpasses.

FLATBEDS

Riccelli has a number of flatbed trailers available for hauling oversized material or equipment. Standard length is 48 feet, but they can be expanded to 82 feet and can safely transport product over 100 feet long.

WALKING FLOOR TRAILERS

We have many of these vehicles for carrying construction debris, municipal solid waste, and other material. The people of Louisiana will remember seeing 50 of these Riccelli units we sent to aid in the cleanup of brush and debris, post-Katrina.

TANKERS

All Riccelli tankers are DEC and HazMat approved. Our vehicles are dispatched every day to safely transport asphalt and other liquid materials, as well as environmentally safe liquids like water or calcium.

DUMP TRAILERS

These versatile vehicles are excellent for transporting stone, gravel, salt and non-hazardous soil. We've put them to work in the past for hauling away hundreds of thousands of tons of contaminated soil from environmental cleanup jobsites.

TO HAUL IT IN OR HAUL IT OUT, RICCELLI HAS YOUR TRUCKS.

No matter what you need transported, we have the right trucks to get it done efficiently, effectively and within your budget. Our 400-truck fleet includes vehicles of all types and sizes. All are radio-dispatched to get to your site when you need them, and all are equipped with GPS tracking systems so there's no lost time. We maintain every vehicle daily, with maintenance facilities at each dispatch office, so we're always operating at peak efficiency.

Of course, the most important feature in any of our trucks is the driver. Riccelli Enterprises' drivers are hand-picked, experienced, licensed in all 50 states, and are among the best in the business. This combination of equipment and

expertise has helped us become New York State's go-to transportation service company. Whether you need trucks, roll-off containers, compactors or other equipment, Riccelli is ready to serve you.

In addition to the 400-truck Riccelli-owned fleet, we can always put 350 additional trucks at your disposal with just one phone call. Twenty-four hours a day, seven days a week. Clearly, Riccelli is the trucking resource you can depend on.

GREAT TRUCKERS AND GOOD CITIZENS TOO.

We take our environmental responsibilities very seriously at Riccelli. Our highly trained drivers maintain strict adherence to all regulations, and put a priority on safety at all times. We've also taken a leading role in efforts to solve the Northeast's scrap-tire issue, and have been a key player in many environmental cleanup projects.

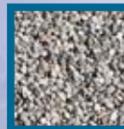

THERE'S MORE TO RICCELLI THAN JUST TRUCKS.

Beyond trucking, Riccelli has become a valuable resource for a number of related services. Our sand and gravel service provides a limitless supply of these commodities for all your needs. And with more than a dozen gravel beds located across Upstate New York, delivery is always prompt and dependable.

Gravel, Round Stone, Washed Stone, Bank Run, Top Soil and a wide variety of Sand are all in our inventory. But we don't stop there — through our relationships with all major quarries in the area, Riccelli has quick access to any other material you may require.

You'll also appreciate our Rail Offloading service, available through our station in Apulia, NY. Located just four miles from I-81 (and just 20 miles from Syracuse), the station is expertly manned and equipped to handle all manner of loading, off-loading and transporting jobs. The 11-acre site has year-round access to 2,800 feet of siding, and can handle up to 20 rail cars at a time.

In Somerville, MA, Riccelli operates a high-volume transfer station, handling traffic from a large number of trucks, trailers and loaders on a daily basis. The facility has maintained an outstanding record for safety, efficiency and environmental compliance.

Grain storage is another new and expanding service now offered by Riccelli Enterprises. Our 58-acre facility in Fulton, NY includes a 128,000-square-foot warehouse, capable of handling vast amounts of grain. For example, Riccelli works with some of New York's major corn buyers, trucking in more than 1,000 tons of dry corn every day.

We also haul both wet and dry distiller's grain to farms across the state, as well as liquified gas and other agricultural commodities. The facility includes an aeration system, hoppers, stackers, a Certified Scale and other high-quality equipment, all of which is maintained on site, every day.

**SEE FOR YOURSELF.
GET A QUOTE TODAY.**

Riccelli Enterprises offers you the efficiency of doing business with one company that can do it all. From hauling whatever you need in to hauling whatever you don't need out; from supplying your stone and sand to storing your grain to loading your railcars. For all this and more, there's only one thing you need to do. **Ride the Bull.** Because the Riccelli Enterprises Bull does everything you need.
